Projects

Daily Developer's Feelings Journal Entry | [View Repo](#)

HTML, CSS, JavaScript, Git

- Built a multipage journaling web app from scratch to help developers track emotions and coding progress.
- Planning to integrate Google Sign-In and a personal dashboard for saved entries, enabling long-term emotional and learning progress tracking.
- Developed interactive emotion buttons with hover and active visual states using vanilla JavaScript for engaging daily reflections.
- Designed for developers on their learning journey to reflect on daily challenges and milestones, promoting self-awareness and growth.

Kanban Board | [View Repo](#)

HTML, Tailwind CSS, JavaScript, Git

- Built a responsive Kanban board UI using vanilla JavaScript and Tailwind CSS, enabling clean, mobile-friendly task management.
- Implemented show/hide sidebar functionality for a streamlined layout and customizable user focus.
- Added light/dark mode toggle, using JavaScript and Tailwind themes to dynamically update the interface.
- Developed a modal-based task form for adding or editing tasks, including dropdown status selection and validation.

Technical Skills

Languages: HTML, CSS, Bootstrap, Tailwind CSS

Developer Tools: Git, VS Code, GitHub

CS Qualities: Technical Excellence, Computational Thinking, Autodidacticism, Reliability, Grit, Critical Thinking, Teamwork
